⁽¹⁾ Screening tests measure Blood Lead Levels (BLL) which reflect lead absorption. BLL tests are venous or capillary and are measured in micrograms per deciliter (ug/dL).

⁽²⁾ Includes initial tests taken between 1/99 and 12/99 with results received by 4/29/00. Includes tests on county and non-county residents.

⁽³⁾ Test results which were questionable, clotted or the results of a lab accident.
