

Need A Flu Shot?

Your own health care provider may be your best option for getting vaccinated against the seasonal flu and the H1N1 flu.

Some providers have already given out seasonal flu vaccines, while others are waiting to receive their vaccine supply.

However, supplies are still limited, so not everyone will be able to get vaccinated at once. More vaccine is coming and vaccinations against H1N1 flu will continue through the coming months, so check back with your provider or pharmacy clinic frequently. Please be patient. It's never too late to get vaccinated!
