**RABIES ALERT**

**Skunk Found at Mercy College's Dobbs Ferry Campus Assumed Rabid**

The Westchester County Department of Health today issued a Rabies alert to all Mercy College students who attend classes at the Dobbs Ferry campus and to residents of Dobbs Ferry who may have had contact with an assumed rabid skunk. On Saturday, February 23, 2002, at 12:30 p.m., a sick skunk was found behind the library of the Dobbs Ferry Campus of Mercy College. The skunk was destroyed and discarded. It is not available for testing but is assumed rabid.

"Anyone who believes that he or she may have had contact with this skunk, or that a pet may have, should call the Westchester County Department of Health immediately at (914) 813-5000 to assess the need for life-saving rabies treatment," stated Dr. Joshua Lipsman, Westchester County Commissioner of Health.

Dr. Lipsman warns that anyone bitten by a rabid animal or having contact with its saliva may need to receive immediate post-exposure rabies treatment. "When administered early enough, before symptoms develop, the treatment is 100% effective," he said. "However, once symptoms occur, in humans or animals, the disease is fatal," he added.

"It is imperative for pet owners to immunize their animals against rabies and to ensure that these vaccinations are kept up to date," said Dr. Lipsman. "Previously vaccinated domestic animals such as dogs, cats, and ferrets, that have experienced contact with this skunk require a booster vaccination within five days of exposure. Such incidents must be immediately reported to the health department," he continued. If residents have questions, they should call the Health Department at (914) 813-5000.

**MORE**

## **RABID SKUNK P. 2**

A change in an animal's behavior is the first sign of rabies. A rabid animal may become either abnormally aggressive or unusually tame. It may lose fear of people and become excited and irritable, or, may appear particularly friendly and affectionate. Staggering, spitting, and frothing at the mouth are sometimes noted. Adults should encourage children to immediately tell an adult if an animal has bitten them and to refrain from touching unfamiliar animals.

All animal bites or contacts with animals suspected of having rabies must be reported to the Westchester County Department of Health at (914) 813-5000, 24 hours a day. For more information about rabies and its prevention, residents can also call the RABIES HOTLINE at (914) 813-5010 or visit the Health Department's Website at [www.westchestergov.com/health](http://www.westchestergov.com/health).
