

AEMS Objectives & Targets and Management Programs 2009

Objective	Target	Program to Achieve Objective and Target	Core Team Leader
1. Close Out Objectives and Targets from 2008	Continue meeting goals	Work on full implementation for previous O&T's	Robert Funicello, Michael Parletta
2. Improve Recycling at the Airport	Proper separation of all recyclables	Meet the requirements of the Westchester County Source Separation Law	Robert Funicello, Michael Parletta, Chris Quail
	Add additional waste and recycling containers	All operators, tenants, and vendors have proper recycling containers	Michael Parletta, Chris Quail
	Purchase locking recycling Dumpster Rolloffs	Prevents tenants from dumping waste materials into recycling containers	Michael Parletta, Chris Quail
3. Upgrade Labeling of Used Oil and Hazardous Waste within satellite Accumulation Areas	Proper Identification of Hazardous and Non Hazardous Waste	Proper Training and Under the requirements of RCRA	Michael Parletta
4. Install Emergency contact information at the Hazwaste storage/accumulation area	Proper Identification of Hazardous/non hazardous waste	Training and	Michael Parletta
5. Upgrade Hazardous Materials manifest descriptions	Proper identification of waste materials	Track waste stream generation and properly describe waste mixtures by preparing profiles that match waste descriptions	Michael Parletta
	Update Hazardous Waste Profiles	Test materials for haz waste definition and prepare correct profiles for specific waste and waste mixtures	Michael Parletta, Joe Fitzgerald
6. Perform PH monitoring	Perform PH Field Grab Sampling for Airport SPDES Permit since the WC Lab will no longer certify our PH samples	Purchase PH Meter and receive training from WC to conduct in house sampling under the ELAP certification of Westchester County Labs	Robert Funicello, Michael Parletta
7. Track and Log HVAC Coolant Leak and recharge information	Document amount of coolant used within our chiller units	Coordinating with contractor and maintenance to calculate amounts of chemical used for recharge	Michael Parletta Alan Fleischman
8. Construct a new Natural Gas Line	Bring in Natural Gas service to reduce emission pollutants and eliminate Fuel Oil UST's	Perform a feasibility study and perform an analysis to determine load requirement by Con Edison for entire airport or Main Terminal Only	Robert Funicello
