(1) Population data are July 1, 1998 estimates, and include women who are in care or custody in long-term health care facilities or penal institutions as well as residents of college dormitories. See Technical Notes for details.

(2) Live births plus fetal deaths. The number of pregnancies has not been adjusted to account for the occurrence of multiple deliveries (twins, triplets, etc.) in conjunction with a single pregnancy.

(3) Age-specific rates are per 1,000 females in the designated age category.

(4) Percent of total pregnancies in respective maternal age group.

(5) Totals do not include 22 births, 8 induced and 3 spontaneous fetal deaths to women age 45 or older and 5 births, 2 induced and 6 spontaneous fetal deaths to women of unknown age.
