

## MAINTENANCE MECHANIC I (CARPENTER)

DISTINGUISHING FEATURES OF THE CLASS: Under supervision, performs apprentice level carpenter maintenance and repair work. The incumbent works in situations which provide training to develop skills and knowledge. The incumbent works independently on less complex and routine projects and under supervision on the more difficult jobs. As the employee's skill and knowledge increase, employee receives less direction until at full performance level. Advancement depends on the assignment and performance of higher level duties on a regular basis and on position availability. In general, jobs involve learning such trade practices and skills as: the proper use of tools and equipment of the trade; the order of assembling parts and what tools and equipment are needed; how to read blueprints, sketches and technical manuals to understand the functions of the parts or systems, to plan and lay out work, to find fault parts, to perform work; repair techniques to be used including methods used in getting the right fits or tolerances; and how to make adjustments and calibrations. Does related work as required.
